Grower Section

Please fill in the following and include this sheet in the box with your samples

Contact name	
Organization ¹	
Probe Tag ²	
Depth (in.) ³	
Address	
State/Province	
Zip Code	
Phone	
Email	
Delay (time between sampling and shipping)	___ days (min) – ___ days (max)
Samples refrigerated during delay?	<input type="checkbox"/> Yes <input type="checkbox"/> No

NOTE FOR LAB: Following an agreement with Ward Laboratories, please ensure the extraction methods used for this lab analysis are LOI 360C/2H for Organic Matter, Water (1:1) for Soil pH, Sikora (1:1:1) for Buffer pH, and Hot Water for boron. Everything else is Mehlich III. Please measure Buffer pH for and all requested P methods for all samples, regardless of pH value.

¹ Write the name of the organization as it is written in the ChrysaLabs app

² The probe tag is 6 digits and can be found in the app or printed near the probe's charging port.

³ Please report the full depth of the pre-hole made prior to sampling with the probe (ex: 0-8"). Do not use the depth indicators marked on the probe itself.

List all the composite tags you wrote on the bags:

Composite Sample Tag	Lab only (Please do not fill)
